EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Longo on June 14, 2006.

The application has been amended as follows:

IN THE CLAIMS:

10. (Currently Amended) A device for varying the direction of an optical beam, comprising:
- a first waveguide directed along a first direction;
 - a second waveguide directed along a second direction different from the first direction; and
 - a bending region interposed between the first and the second waveguide, said bending region comprising:
 - a photonic crystal having a regular periodicity and having at least a first and a second crystal axes substantially aligned with said first and second directions, respectively; and
 - a reflecting surface delimiting said photonic crystal and so positioned and oriented as to have the normal to said reflecting surface bisecting the first and second crystal axes and as to reflect an optical beam coming from the first waveguide toward the second waveguide,

wherein said photonic crystal is arranged so as to guide the optical beam coming from the first waveguide to the reflecting surface and to guide the reflected optical beam to the second waveguide.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP 2001-188139 to Minolta Co Ltd discloses a photonic crystal 9 positioned between 2 or more waveguides (4, 5, 6). The photonic crystal has a delimiting reflecting surface 9a. Publication No. US 2003/0123827 A1 to Salerno et al. discloses photonic crystal mirrors 1882 positioned between crossing waveguides (Fig. 54A). Patent No. 6,064,506 to Koops discloses an optical switch having waveguides and photonic crystals with reflective properties. Patent No. 6,064,506 to Koops discloses an optical switch using waveguides coupled with photonic crystals having reflective properties. Patent No. 6,760,513 B1 to Heitmann et al. discloses an optical system using waveguides coupled with photonic crystals having reflective properties.
